WORKSHOP FURNITURE GUIDE

TRUESTEEL® **T**TECHNIQUE **GEA**

Two British companies have forged a partnership that amalgamates the many years of project and cabinet experience at TRADE GARAGE EQUIPMENT, with the unique design and production facilities within TRUESTEEL.

TRUESTEEL's design and manufacturing technique will accommodate a vast range of different size toolboxes, storage cabinets, automotive tools safe storage, central services cabinets and in-house waste separation and management.

TRADE GARAGE EQUIPMENT, has decades of experience in providing such solutions to the automotive and motorsport industry, marine and agricultural industries, factory facilities as well as specialised cabinets for sports and educational environments.

TRUESTEEL use the most advanced design software within their manufacturing processes. Therefore, workshop storage solutions can be sized to within millimetres to suit any application for any given space available.

TRUESTEEL strength and longevity is a core feature within the design. Using 1.5mm and 2mm British steel, it is cut, bent and tig welded into exceptionally strong panels enabling the most sturdy workstation cabinets, with unrivalled size and weight capacities for toolbox drawers.

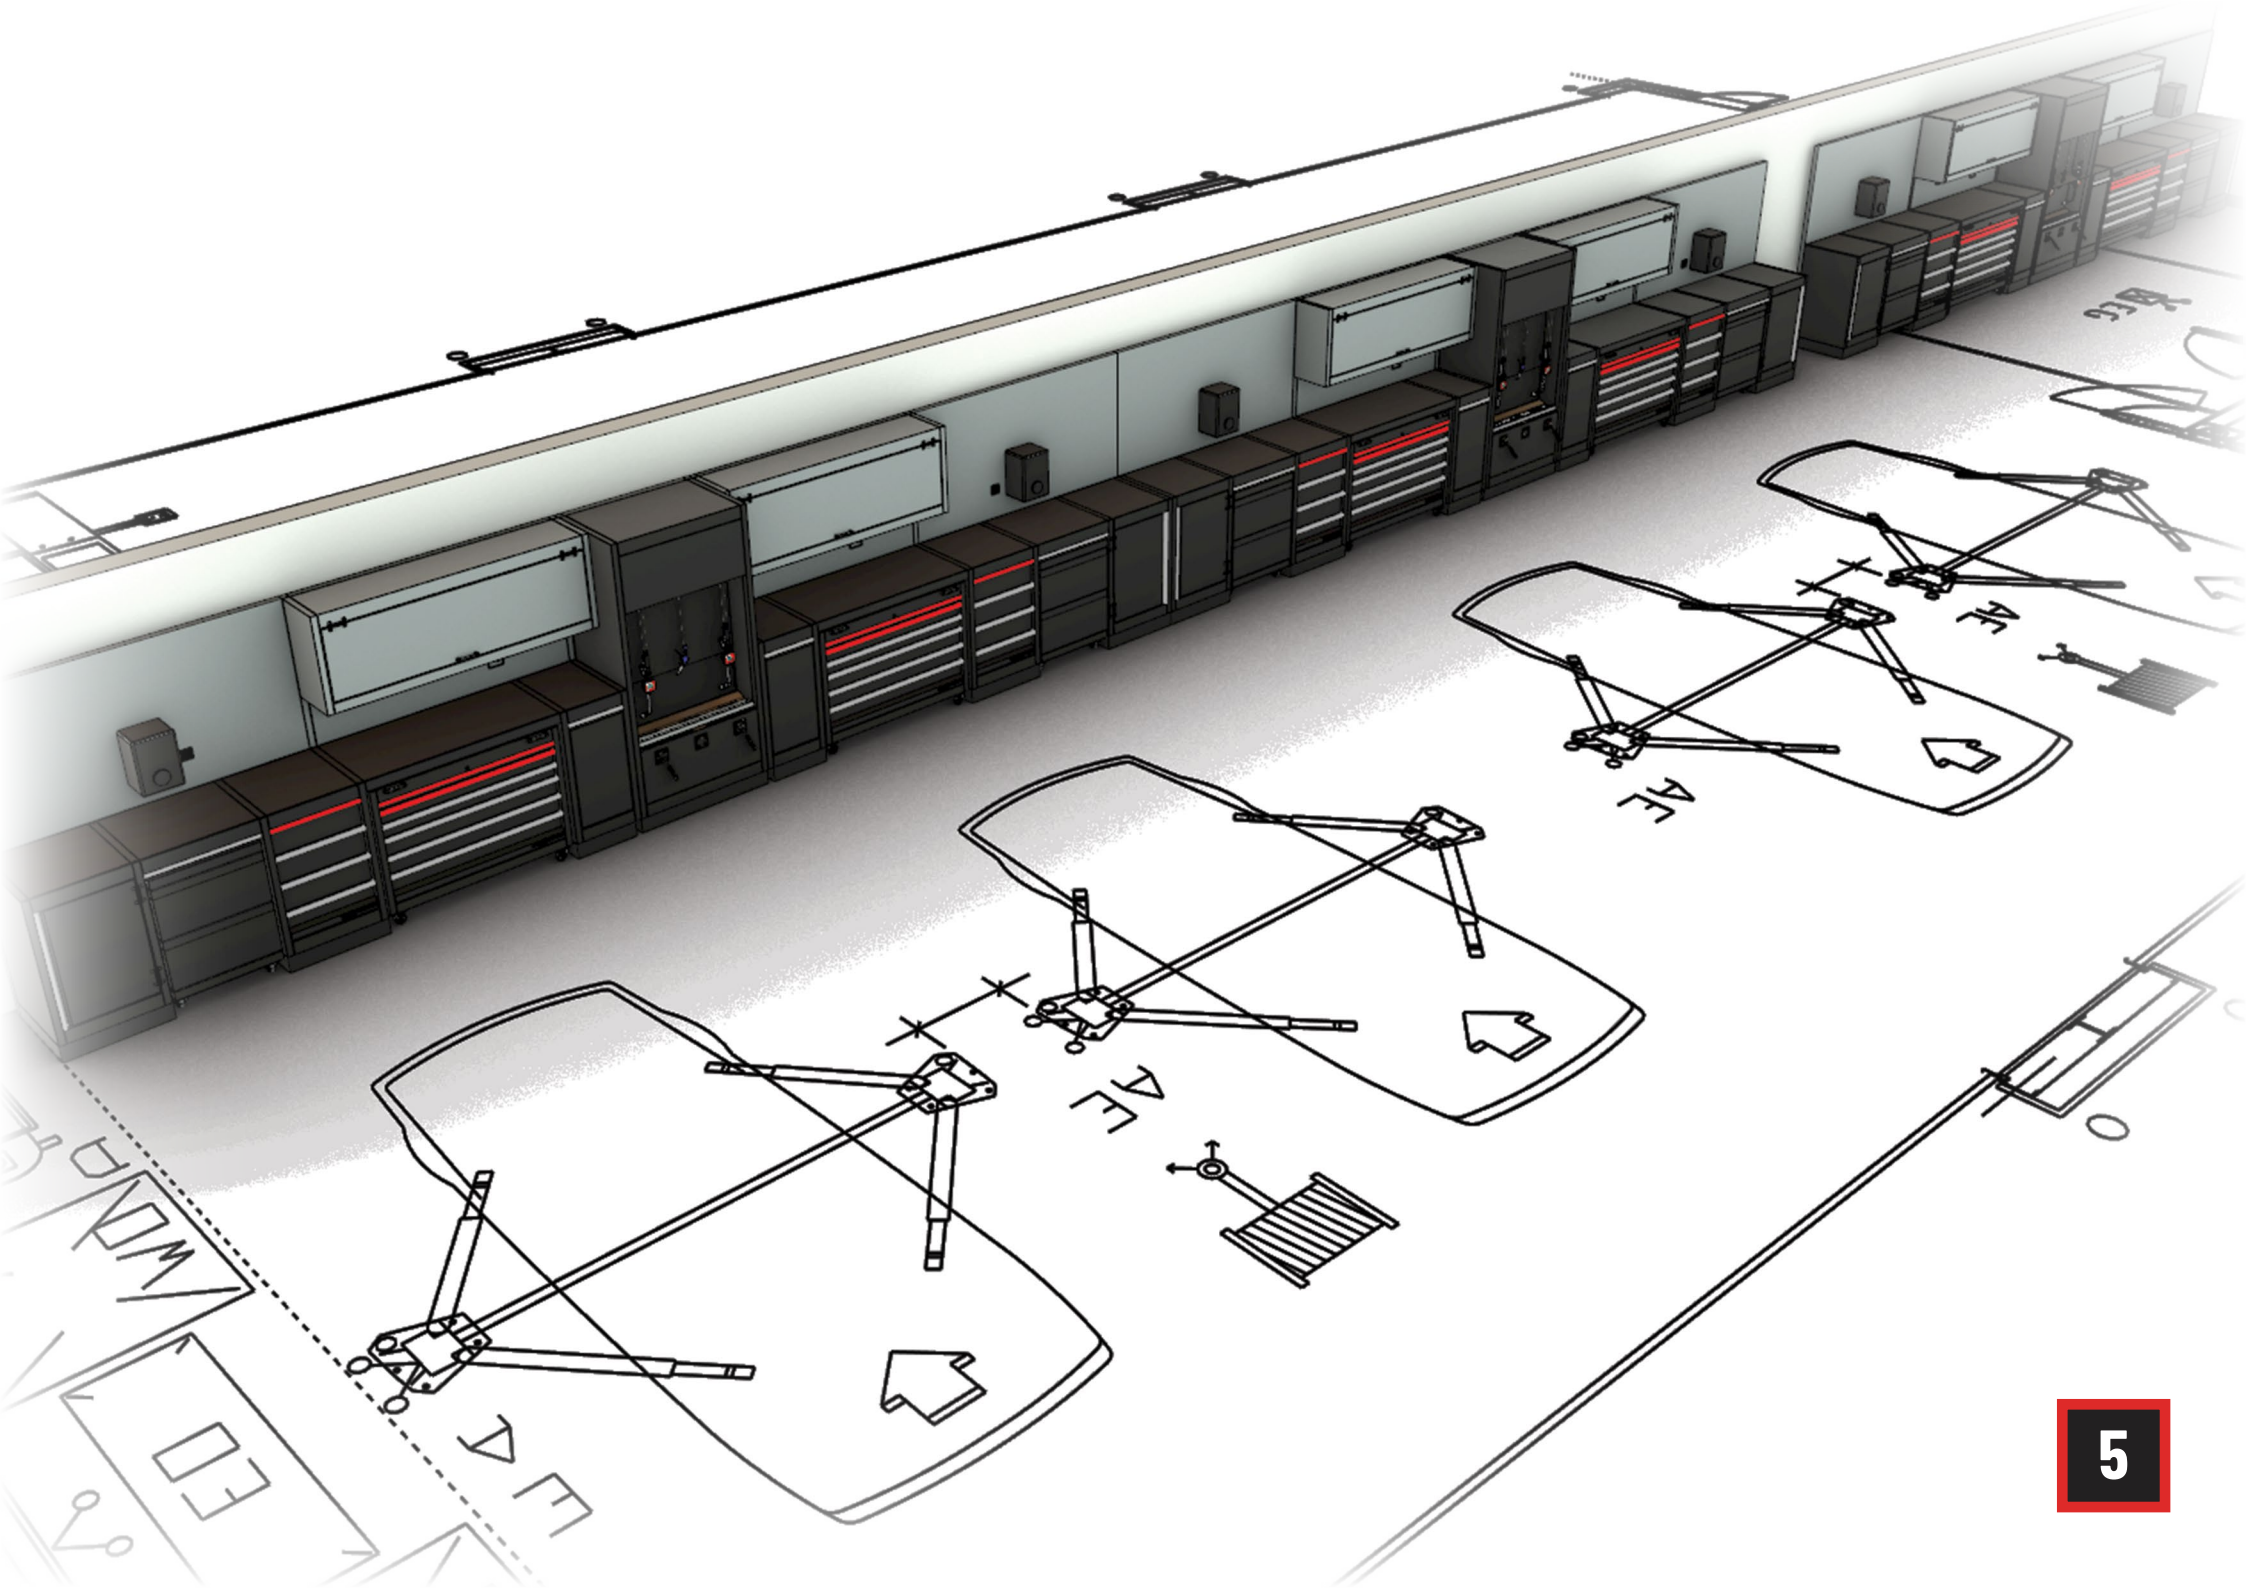

For the ultimate workshop appearance and functionality, you can be confident that the TRADE GARAGE EQUIPMENT and TRUESTEEL partnership is unrivalled within the industry, leaving customers with cabinets that will offer sustainability well into the future.
